TIPPER SPECIAL

WE MAKE ANY TRUCK YOUR TRUCK | [LAGOACCESSORI.IT](https://www.lagoaccessori.it)

What is the difference between “any truck” and “your truck”?

The difference lies in the details, the personal touch of who uses the vehicle, the choice of accessories, the unique combination of elements that turns a stock standard vehicle into a worthy work partner.

TIPPER LINE IS ALL RIGHT

TIPPING THE BALANCE IN FAVOR OF UTILITY THROUGH SPECIALIZED ACCESSORIES

Why TIPPER SPECIAL?

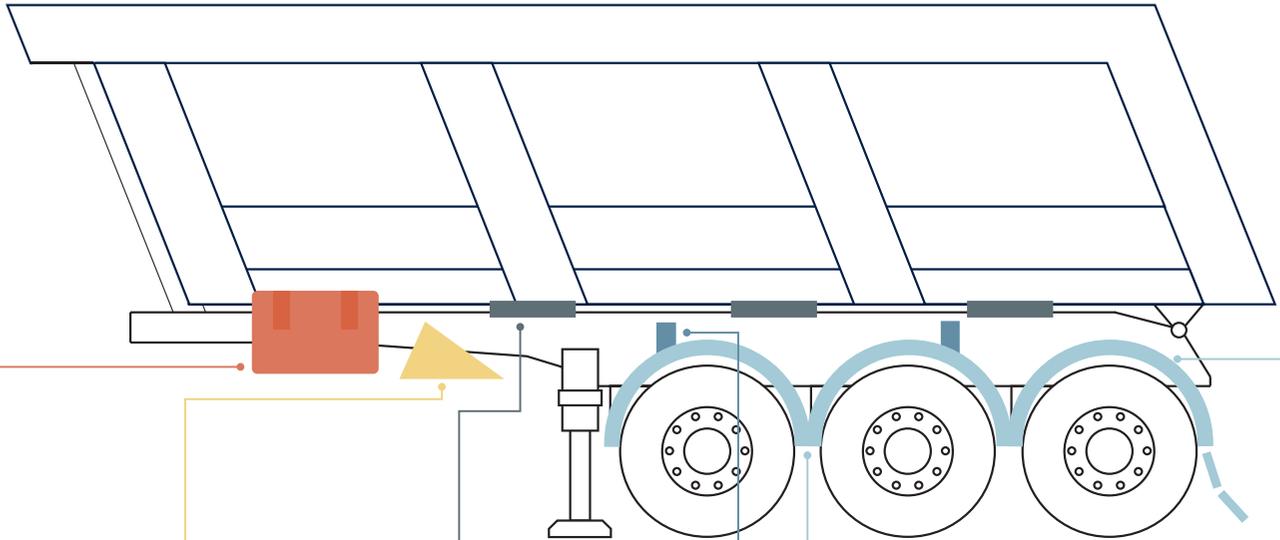

Simply because we realized that this specific type of vehicle, currently produced on a very broad scale, is undergoing major growth, and the market does not offer accessories and components which have been specifically thought for this application.

The major builders and even the smaller shops, currently address the specific needs of this category in house, recurring to low added value and inefficient means such as sheet metal cutting, welding, adaptation and assembly of the rear mudguards to be able to equip the vehicle with an articulated pivoting mud-flap, which is a necessary condition for tipper vehicles: our answer is KOMBI TIPPER, a ready-made, ready to install solution to this important pre-requisite.

Even a humble accessory such as a shovel and broom holder, of which all vehicles of this type are necessarily equipped, places our newly released PORTTER in the category of neat, dignified and ready to use system solutions as an alternative to hand made variants which besides being expensive, result less integrated in the overall picture. We made two versions, a first version which is “co-installed” with our KOMBI mudguards and a second “universal” solution.

A true small revolution of its type can be found in FORMEEGA, the only tipper body dampener pad featuring adjustable positioning and quick mounting hardware through a clamping system which completely eliminates welding, bolting and gluing.

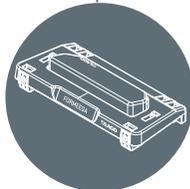

And finally, to complete our TIPPER LINE range, our new tool box organizer DIVIDEA, which readily upgrades LAGO BLACK DOG and VERTIGO tool boxes into tidy, organized and useful travel utilities and also SOPÈO, the type approved wheel chock.

KOMPLEET KOMBI

MODULAR MUDGUARD WITH INTEGRATED MUDFLAP,
ANTISPRAY AND ADJUSTABLE BRACKETS

UV stabilized polypropylene copolymer

Colour: black and grey (UV stabilized)

Values on all fronts

4 different modules: Kombi Basic, Kombi 150, Kombi 250 and Kombi 350

50 / 75% less packed volume - Save on logistics, handling and storage

Simple assembly

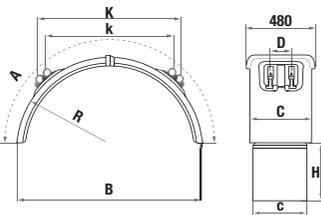

No preliminary drilling, riveting gluing or fastening operation

Substantial weight reduction through part integration

Scratch resistant proprietary surface

Adjustable Ø42 mm fixing eyelet - Max torque 12Nm

Eyelet clamping fasteners Geomet® surface treated - Extra corrosion resistant - Absence of other ferrous parts

all dimensions are in mm
